CHILLERS

FX

AIR SOURCE CHILLERS WITH SCREW COMPRESSORS, FROM 289 TO 1710 kW

climaveneta.com

CLIMAVENETA®
SUSTAINABLE COMFORT

FX

THE KEY CHILLER FOR COMFORT AND PROCESS APPLICATIONS.

Air source chiller for outdoor installation
289 - 1710 kW

EUROVENT CERTIFIED PERFORMANCE
www.eurovent-certification.com

FX features screw compressors optimized for R134a refrigerant, axial fans, micro-channel full-aluminum condensing coils, electronic expansion valve, and single-pass shell and tube evaporator designed by Mitsubishi Electric Hydronics and IT Cooling Systems.

The controller, specifically developed in-house, offers advanced thermoregulation and energy saving functions. The innovative user interface, called KIPlink, is based on Wi-Fi technology and allows you to operate on the unit directly from a mobile device.

COUNTLESS VERSIONS FOR THE MOST CHALLENGING NEEDS

K	**Key efficiency**	Cost effective units that grant the best combination between cooling capacity and footprint.	**EER*: 2,89** **ESEER*: 4,28**
CA	**High efficiency**	High performing units with generous heat exchanger surfaces which reduce energy expenses and cut running costs.	**EER*: 3,19** **ESEER*: 4,39**
E	**Very high efficiency**	Extremely efficient units for the best energy savings and the minimum investment payback time. The oversized condensing section ensures an appropriate heat exchange even in case of high outdoor air temperature, making this unit also suitable for the hottest regions.	**EER*: 3,33** **ESEER*: 4,46**

* Average values

ACOUSTIC VERSIONS

-	**Standard**	Unit with standard soundproofing equipment.	**Baseline**
		Unit with compressor acoustical enclosure (Opt. 2301).	**-2 dB(A)**
		Unit with noise reducer kit (Opt. 2315).	**-7 dB(A)**
SL	**Super low noise**	The highest level of noise reduction which cuts noise emissions by 10 to 12 dB(A), without compromising the unit's efficiency.	**-12 dB(A)**

HEAT RECOVERY CONFIGURATIONS

-	**Standard unit**	Unit for the production of chilled water.	**Baseline**
D	**Partial heat recovery**	A desuperheater on the compressor discharge line recovers approximately 20% of the unit's capacity. **Suitable for DHW production or other secondary uses, such as the integration of an existing boiler.**	**60°C**
R	**Total heat recovery**	A devoted refrigerant water heat exchanger recovers all the condensation heat. **Suitable far DHW production or air treatment in applications with AHU.**	**55°C** **60°C** **with HT kit**

FX brings advanced technology and know-how together in customizable packages to aid design, specification, installation, and on-going operations.

PROFOUND EXPERTISE

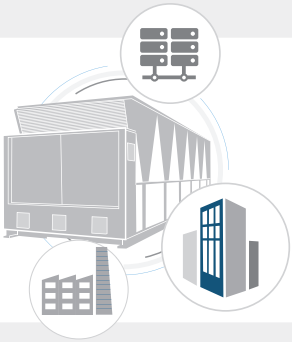
With thousands of units installed worldwide since 2003, Climaveneta air-cooled screw chillers have evolved into the third generation: FX. The highest manufacturing quality, proven reliability, and full configurability are the reasons behind the success of this range. Today FX combines extensive expertise with the latest technology to deliver you the best value.

TAILORED EFFICIENCY

Fully customizable with a range of efficiency and acoustic versions, FX allows custom-made application design for individual projects. Thanks to devoted technological solutions and accurate design, each FX configuration brings high full load performance and brilliant part load efficiency together, thus helping individuals and businesses reduce the energy consumption of their HVAC systems and cut their running costs.

POWERFUL ADAPTABILITY

Modern multi-use buildings, shopping centers, business centers, and process cooling applications are just some of the examples where increased comfort and precision control are required. The FX range can deliver all of this and more through its ability to be easily integrated into ever increasingly complex building systems.



Unyielding in extreme conditions
FX can operate in all climates from -20°C to +54°C and, equipped with highly resistant coil coatings, it can withstand even the harshest industrial or marine environments.

Quick & Easy installation
The integrated hydronic modules allow for easy and fast installations and the advanced water flow controls allow the unit to make the most of the variable-speed pumps, bringing time-saving commissioning, and significant annual energy cuts.

High degree of configurability
Thanks to a whole range of configurations and accessories, FX easily adapts itself to any commercial and industrial system needs. Specific solutions are available to match even the most mission critical application requirements.

COMFORT APPLICATIONS

- Hotels
- Shopping centres
- Office buildings
- Museums
- Education centres
- Sport facilities
- Banks
- Institutions

PROCESS AND IT COOLING APPLICATIONS

- Logistic sites
- Manufacturing sites
- Automotive
- Food and Beverages
- Plastic Molding
- Pharmaceutical
- Telecommunications
- Data centers

ASHRAE 90.1 compliant

Compliant with the minimum energy performance set by ASHRAE 90.1-2013, FX helps you meet LEED requirements, which adds value to your buildings.

ECODESIGN COMPLIANT

FX chillers deliver the seasonal energy efficiency targets for comfort cooling (SEER) and process cooling (SEPR) required by the latest European regulations.

TECHNOLOGICAL CHOICES

W3000TE CONTROL

Fully in-house developed management software.

- Efficient and reliable operation in all conditions
- Connectivity with the most commonly used BMS protocols (Opt.)

KIPlink USER INTERFACE

Innovative Wi-Fi interface for an easy and enhanced unit management.

Comunication based on Wi-Fi technology (no internet connection needed)

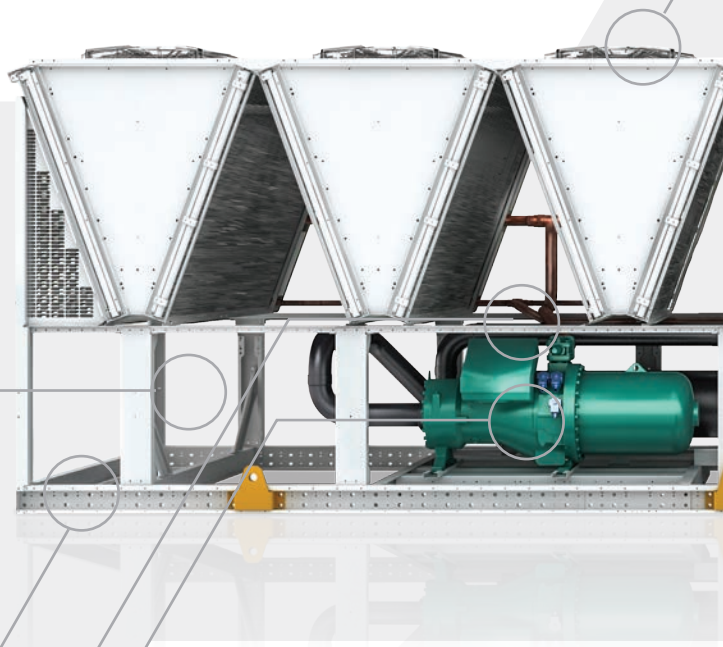
Hardware Industrial characteristics, tolerates temperatures from -20 to +65°C

An exclusive product of Mitsubishi Electric Hydronics & IT Cooling Systems

Built-in pump group (Opt.)

Factory-mounted pumps and pre-plumbed hydraulic components, for the minimum on-site installation time, work and cost.

- Fix speed and variable speed pumps available, with low or high head
- Electronic primary flow controls for constant pressure or constant temperature



Casing

Base and frame made of hot-galvanized steel, all parts polyester-painted.

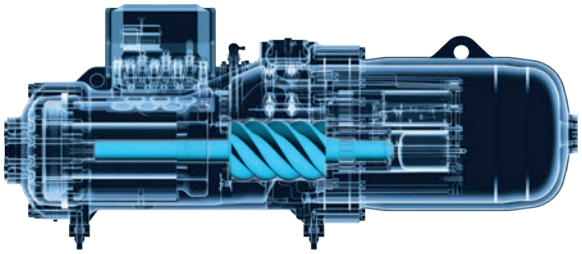
- Easy access to all inner components
- Simple transport, lifting, and handling
- Total weather resistance

Refrigerant circuits

Dedicated and independent refrigerant circuits to grant non-stop operation and easy maintenance.

CSC screw compressors

Dual rotor screw compressors designed according to Mitsubishi Electric Hydronics & IT Cooling Systems specifications and for its exclusive use.



Trusted reliability, simplified installation, maximized performance: FX improves the already high performance of the Climaveneta chiller range adding new exceptional features.

Variable speed fans

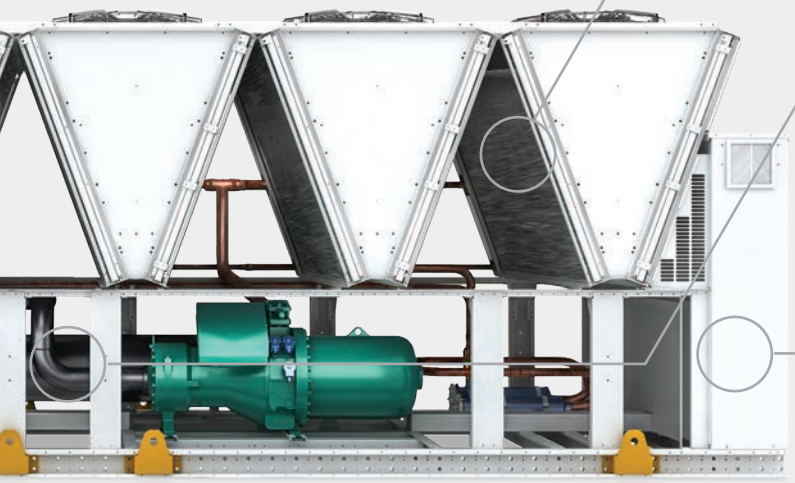
High performing axial fans equipped with autotransformer for speed adjustment.

- Precise air-flow management, reduced power consumption and lower sound levels at part load
- Totally independent ventilation system for each refrigerant circuit
- EC fans available with proprietary algorithm for energy savings and very low ambient operation (Opt.)

Micro-channel coils

New generation full aluminum micro-channel coils, ideally positioned on a “V” block structure to optimize airflow and heat transfer.

- Up to 30% of refrigerant charge reduction vs. traditional tube and fin coils.
- Long Life Alloy (LLA) for higher corrosion resistance and longer life cycle
- Protective coating available for harsh industrial and marine evironments (Opt.)



Shell and tube evaporator

Dry expansion, single pass shell and tube evaporator, fully developed by Mitsubishi Electric Hydronics & IT Cooling Systems.

- Internally grooved copper tubes for enhanced heat exchange
- Low pressure drops
- Fully protected against ice formation

Electrical panel

Large electrical panel with power circuit components and control main board.

- Forced-air cooling system
- ATS available for double power supply set-up (Opt.)

Innovative internal geometry

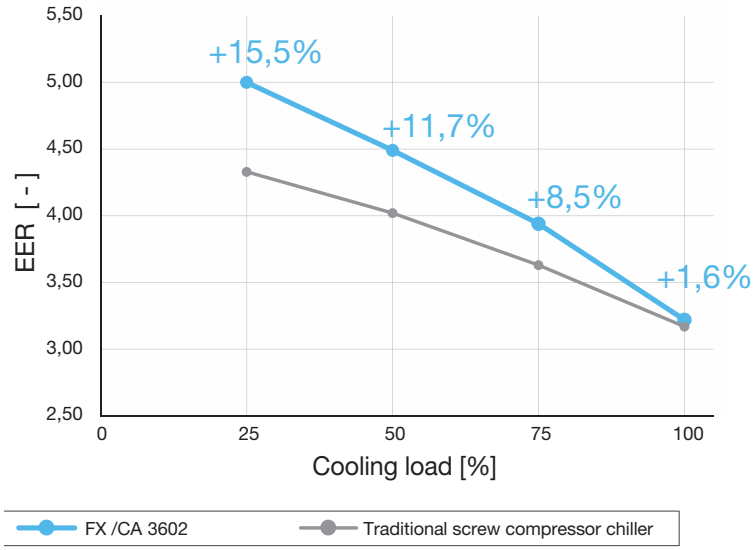
Thanks to its specific design, aimed at optimizing the internal volumes for partial load operation, the CSC compressors deliver excellent performance in all the different operating conditions.

Enhanced lubrication system

A special oil management valve calibrates the oil circulation and delivers a remarkable increase of the compressor efficiency at partial loads.

Extreme durability

The brilliantly engineered mechanics include carbon steel bearings guaranteed for a lifetime of 150.000 hours.



graph shows the chiller efficiency with the variation of the load rate and air temperature (ESEER operating conditions

CORE FEATURES FOR ALL YOUR EQUIPMENT NEEDS

W3000TE control and KIPlink innovative interface

The logic behind FX is the W3000TE control software. Characterized by advanced functions and algorithms, **W3000TE features proprietary settings** that ensure faster adaptive responses to different dynamics, in all operating modes. Direct control over the unit comes through the innovative KIPlink interface.
Based on Wi-Fi technology, **KIPlink** gets rid of the standard keyboard and **allows one to operate on the unit directly from a mobile device** (smartphone, tablet, notebook).

Easier on-site operation

Monitor each component while moving around the unit for maintenance operations. View and change all parameters with easy-to-understand screenshots and dedicated tooltips.
Get devoted “help” message for alarm reset and trouble shooting.

Real-time graphs and trends

Monitor the immediate labor status of the compressors, heat exchangers, cooling circuits and pumps.
View the real-time graphs of the key operating variable trends.

Data logger function

View history of events and use the filter for a simple search.
Enhance diagnostics with data and graphs of 10 minutes before and after each alarm.
Download all the data for detailed analysis.

How to access the unit with KIPlink

Direct access to the W3000TE control is achieved by scanning the QR-code positioned on the front side of the FX unit.

LED switch

The three-colour LED button positioned on the electrical board allows the user to switch the unit on/off and visualize the genaral status of the equipment without using any mobile device.

In addition (Opt. 1442, 1444) or in substitution (Opt. 6194, 6195) to the KIPlink, FX can be provided with: a 7” color touch screen interface or with a keyboard with large display and LED icons.
In these cases, the LED switch is not provided. Remote keyboard is possible (Opt. C9261063, C9261064, C926108911, C926108913).

HFO green refrigerants

In line with the most severe environmental regulations, FX is also available with the new green **HFO 1234ze refrigerant**.

A solution that complies with the highest efficiency targets required by modern projects, whilst offering an eco-friendly alternative to HFCs.

* Average values

A full range of air cooled chillers optimized for using the HFO refrigerants:

HFO 1234ze
GREENEFFICIENCY

16 sizes	From 286 to 1458 kW
CA efficiency	EER*: 3,17 ESEER*: 4,33
SL version	Up to -12 dB(A)

Climaveneta brand products have been always synonymous for best in class performance and high versatility. That's particularly true for FX, the innovative chiller where all the features have been designed for the complete customer peace of mind.

Hydronic modules and flow controls

The FX units can be equipped with a factory-mounted complete pump group, which **optimizes hydraulic and electrical installation** space, time and costs, or simply with terminals to control the external pumps with the unit control logic.

Factory-mounted pump group

2 pumps (duty/standby) provide low or high head (available head approx. 100 or 200 kPa).

Fixed speed pumps
2-pole motor: Opt. 4711 (LH) / 4712 (HH)
4-pole motor: Opt. 4708 (LH) / 4709 (HH)

Variable speed pumps
2-pole motor: Opt. 4722 (LH) / 4723 (HH)
4-pole motor: Opt. 4719 (LH) / 4721 (HH)

Terminals for external pump control

The unit controls the activation or the activation and speed of 1 or 2 external pumps.

ON/OFF signal
Opt. 4702 (1 pump) / 4703 (2 pumps)

Modulating signal
Opt. 4713 (1 pump) / 4714 (2 pumps)

For a quick and easy commissioning, it is possible to set the speed of the inverter driven pumps directly from the control of the unit and adjust the flow rate according to the actual plant head losses (Opt. 4862).

Close-coupled pumps by Grundfos

SiC/SiC (silicon carbide) primary seal pairing, extremely resistant against wear, abrasive particles and wear.

EPDM bellows seal prevent the risk of deposits, such as rust, on the shaft.

Pull-out design: during maintenance the power head can be pulled out without removing the pump housing from the pipework.

In-line or end-suction models were chosen based on dimensions and performances

VPF control logic

The VPF control series (Variable Primary Flow) doesn't only **adjust the pump speed on the basis of the plant's thermal load**, but also **dynamically optimizes the unit's thermoregulation** for variable flow operation, thus ensuring both the highest pump energy savings and chiller stable operation.

VPF: constant ΔP on the plant side
For systems with only the primary circuit.
Opt. 4864 or 4865 for single unit system
Opt. 4866 for multi-unit system

VPF.D: constant ΔT on the plant side
For systems with primary and secondary circuits separated by a hydraulic decoupler.
Opt. 4867 for single unit system
Opt. 4868 for multi-unit system

Operating limits

- ☐ Standard unit
- ■ Required: Kit HT (Opt. 1955)
- ■ Required: EC fans (Opt. 808)
- ■ Required: DBA device (coil flooding) (Opt. 813)
  EC fans (Opt. 808)

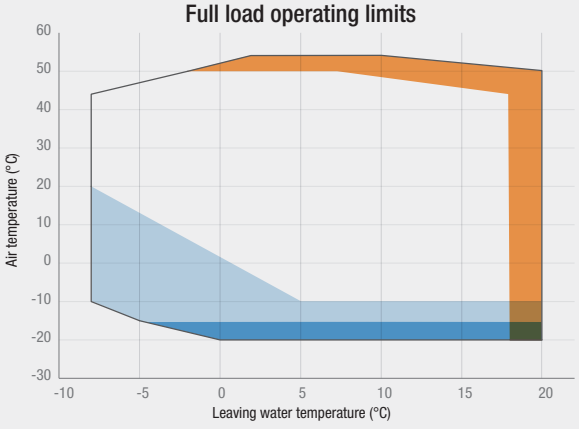
Air temp. < -10°C: Double insulation on heat exchangers (Opt. 2631)
LWT < 0°C: Compressor liquid injection (Opt. 871)

Partial load operating limits

In case of higher outdoor air temperature, FX automatically partializes its resources to ensure uninterrupted operation (HPTC function).

Operating limits when working partialized (water */7°C):

FX /K, FX /SL-K	53°C
FX /E, FX /SL-E	55°C
FX /CA, FX /SL-CA	55°C
+kit HT (all versions)	57°C



The diagram shows the operating limits of versions /E, /SL-E
For versions /K, /SL-K, the max outdoor temperature is lowered by 4°C
For versions /CA, /SL-CA, the max outdoor temperature is lowered by 2°C

ACCESSORIES AND SERVICES

EC fans

EC fans (Opt. 808): Electronically commutated fans with brushless motor to continuously adjust the speed in order to minimise energy consumption and noise emissions, especially at part loads (+1% of EER, +4-5% of ESEER).

+5%
ESEER

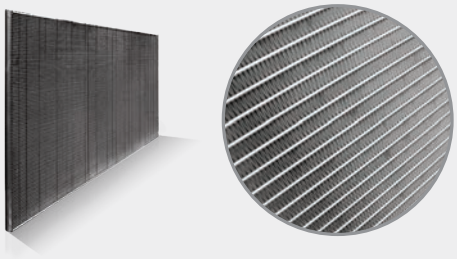
Noise reduction

Compressor acoustical enclosure (Opt. 2301): Enclosure realised with painted sheet metal panels lined with an acoustic insulation.
Sound power reduction: -2 dB(A).

Noise Reducer kit (Opt. 2315):
The kit includes dedicated fans' speed calibration together with the soundproofing of the most critical components in order to minimise sound emissions as much as possible. Sound power reduction: -7 dB(A).

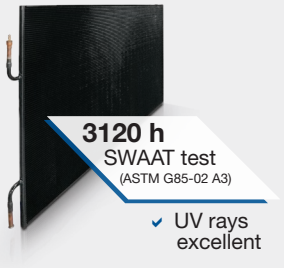
COILS AND COATINGS

MICROCHANNEL COILS

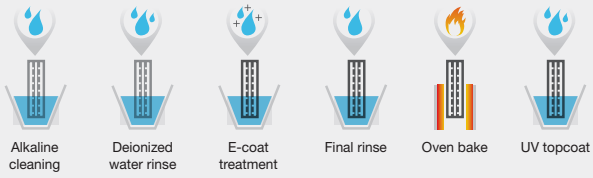


Al - Regular (std)

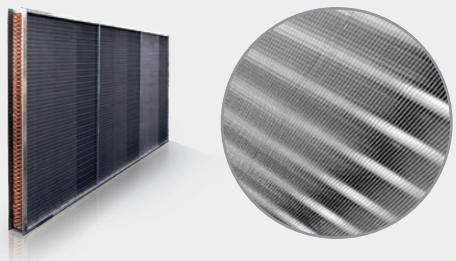
Al - E-coating (Opt. 876)



E-coating process



TUBE & FIN COILS



Cu/Al - Regular (Opt. 879)

Cu/Al - Pre-painted fins (Opt. 894)

Cu/Al - High pressure spray coating (Opt. 895 / RFQ)

Fin Guard Silver SB * Opt. 895	PoluAl XT * RFQ	Heresite P-413C * RFQ
Polyurethane resin with aluminum fillers	Polyurethane resin with aluminum fillers	Phenolic resin
✓ **3000 h** ASTM B117	✓ **4000 h** ASTM B117	✓ **6000 h** ASTM B117
✓ **UV** rays - excellent	✓ **UV** rays - excellent	✓ **UV** rays - good
* Thermoguard	* Blygold	* Heresite Protective Coating, LLC

Cu/Cu - Tube & fin coil (Opt. 881)

All the flexibility you need to fit the most diverse application requirements

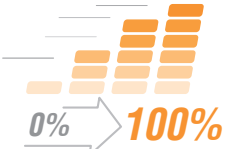
Equipment for mission critical applications

Committed to ensure the highest standards of reliability, FX includes a full range of devices and functions that maximize unit's uptime in case of emergency circumstances.

FAST RESTART

Ensures a **faster return to the necessary cooling** levels in the shortest time possible, while maintaining the **reliability** of the chiller.

Ensure immediate cooling start-up within 25”



Have the unit running at full load in a shorter time

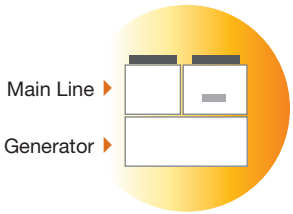
A 2-cpr unit in standard working conditions delivers 100% of cooling capacity within 180” after power is restored.

Fast restart - UPS excluded (Opt.4501)
This option requires an external 230V AC UPS, not supplied with the unit, to keep the on-board controller functional and ensure fast restart after a power outage.

Fast restart - UPS included (Opt. 4502)
This option includes an electric device capable of keeping the controller power supply uninterrupted during a power failure. The capacity of this device is selected on the basis of the needs of a specific project.

DOUBLE POWER SUPPLY

Redundancy increases uptime. FX extends this concept also to the electrical supply: the unit, equipped with an ATS*, can be connected to two separate power lines to enhance the system's dependability.



In case of a main line power outage, the ATS* automatically switches over to the backup line, granting uninterrupted power supply to the unit.
The double power supply makes FX suitable for Uptime Institute's TIER III and TIER IV** design topologies, the highest standards of reliability.

* ATS: Automatic Transfer Switch
** The Tier Classification System provides the data center industry with a consistent method to compare typically unique facilities based on expected site infrastructure performance, or uptime.

Double power supply (ATS) (Opt. 1561)
The ATS, installed within the electrical board, automatically senses if one of the sources has lost or gained power. The switching is completely automatic (line priority and frequency of checking are selectable).

Double power supply (Motorized changeover) (Opt. 1562)
The motorized changeover, installed within the electrical board, is with remote control (i.e. signal of generator start-up).

Witness Testing

Test your chiller before its installation and make its performance totally reliable.

Performance WITNESS TEST

Performance Witness testing is available as additional service in order to allow the final user to see the unit being tested under specific conditions. Carried out within modern and sophisticated facilities, this service gives the customer the possibility to choose among different witness test options in order to:

- Verify unit operation under severe conditions
- Detect sound emissions
- Check performance, both at full and partial loads
- Test the unit with low outdoor air temperature operation
- Time the fast restart

Notes:

1 Plant (side) cooling exchanger water (in/out) 12°C/7°C; Source (side) heat exchanger air (in) 35°C.
2 Values in compliance with EN14511-3:2013.
3 Average sound pressure level at 10m distance, unit in a free field on a reflective surface; non-binding value calculated from the sound power level.
4 Sound power on the basis of measurements made in compliance with ISO 9614.
5 Sound power level in cooling, outdoors.
6 Unit in standard configuration/execution, without optional accessories.

The units highlighted in this publication contain HFC R134a [GWP100 1430] fluorinated greenhouse gases.

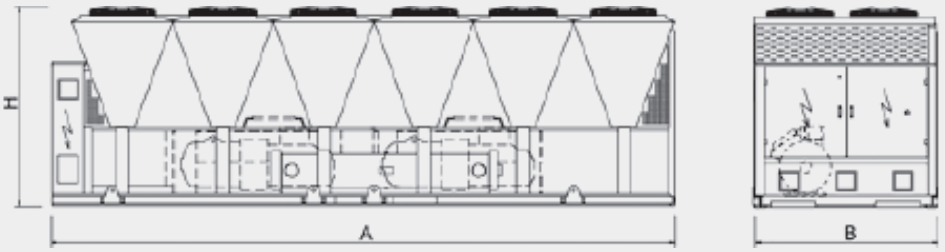
Operating weight	(6)	kg	8780	9040	10120	12160	12330	12640



Notes:

1 Plant (side) cooling exchanger water (in/out) 12°C/7°C; Source (side) heat exchanger air (in) 35°C.
2 Values in compliance with EN14511-3:2013.
3 Average sound pressure level at 10m distance, unit in a free field on a reflective surface; non-binding value calculated from the sound power level.
4 Sound power on the basis of measurements made in compliance with ISO 9614.
5 Sound power level in cooling, outdoors.
6 Unit in standard configuration/execution, without optional accessories.

The units highlighted in this publication contain HFC R134a [GWP100 1430] fluorinated greenhouse gases.

FURTHER OPTIONS

Auxiliary input

4-20 mA (Opt. 6161): Enables remote set-point adjustments (analog input).

Double set-point (Opt. 6162): Enables the remote switch between 2 set-points (digital input).

Demand limit (Opt. 6171): Limits the unit's power absorption for safety reasons or in temporary situations (digital input).

Electrical

Compressor rephasing (Opt. 3301): The capacitors on the compressors' line increase the unit's power factor.

Automatic circuit breakers for compressors (Opt. 3411) or all major electrical loads (Opt. 3412): Protects the compressors or the compressors and fans from possible current peaks, over-current switches are provided in place of the standard fuses.

Soft-starter (Opt. 1511): Manages the inrush current enabling lower motor windings' mechanical wear, avoidance of mains voltage fluctuations during starting and favorable sizing for the electrical system.

BMS connection

Serial card interface module to allow integration with BMS protocols:
Modbus (Opt. 4181) / **LonWorks (Opt. 4182)** / **BACnet MS/TP (Opt. 4184)** / **BACnet over IP (Opt. 4185)**

Energy Meter

Energy meter for BMS (Opt. 5924): Acquires electrical data and the power absorbed by the unit and send them the BMS for energy metering (Modbus RS485).

Refrigerant circuit

Dual pressure relief valves with switch (Opt. 1961): One valve is isolated from the refrigerant circuit while the other is in service. The user can work on the isolated valve for periodic maintenance or replacement, without removing the refrigerant from the circuit.

Compressor suction valve (Opt. 1901): Installed on each compressor suction line, it simplifies maintenance activity (discharge valves are present as per standard).

Refrigerant leak detector

Leak detector (Opt. 3431): Factory installed device. In case of a gas leak detection it raises an alarm.

Leak detector + compressor off (Opt. 3433): Factory installed device. In case of a gas leak detection it raises an alarm and stops the units.

Hydraulic

Water flow switch (Opt. 1801): Designed to protect the unit where the water flow across the evaporator is not sufficient and falls outside of the operating parameters.

Delta T > 8°C (Opt. 2881): Evaporator designed to operate with low primary circuit water flow.

Flanged hydraulic connections (Opt. 2911): Grooved coupling with flanged counter-pipe.

Structure

Anti-intrusion grilles (Opt. 2021): Perimeter metal grilles to protect against the intrusion of solid bodies into the unit structure.

Rubber type (Opt. 2101) or spring type (Opt. 2102) anti-vibration mountings: Reduce vibrations, keeping noise transmission to a minimum.

Packing

Reinforcing bars (Opt. 1971): Steel brackets used to strengthen the unit structure. Suggested in case of long truck transport.

Nylon packing (Opt. 9966): FX is covered with a protective nylon layer and provided with the lifting eye-plates, to load the unit into a truck.

Container packing (Opt. 9979): FX is covered with a protective nylon layer, provided with structural reinforcing bars and equipped with both lifting eye-plates and handling devices to load it on a container (metal slides, front handling bar).

LISBON AIRPORT

2016 Lisbon - Portugal

Application: Airports
Plant type: Hydronic System
Cooling capacity: 12065 kW
Heating capacity: 1112 kW
Air flow: 35000 m³/h

Installed machines:
3x FOCS2/CA air cooled high efficiency chillers, 6x FOCS2/SL-CA air cooled low noise chillers, 2x RECS/LT, air cooled heat pumps, 2x WHISPER-E rooftop units

Project
Only 7 km from the Portuguese capital, Lisbon Airport opened in 1942 but between 2007 and 2016 it underwent several improvements and expansions. Today Lisbon airport is the main international gateway to Portugal, a major European hub and it is the 22nd largest airport in Europe in terms of passengers.

Challenge
In order to improve the quality of the infrastructure and meet the comfort needs of the increasing number of travellers also the air conditioning systems had to be improved with highly efficient and reliable solutions.

Solution
The HVAC system is among the strong points of the new infrastructure. It is mainly based on several large Climaveneta chillers and heat pumps. Going into detail, 3 FOCS2/CA, 6 FOCS2/SL-CA and 2 RECS/LT have been installed in the first stage of the work and 2 WHISPER-E rooftop units with advanced enthalpic heat recovery were selected later on to grant perfect comfort in the new Terminal 2. All together they provide the highest energy efficiency both for the very high cooling loads as well as for the heating needs of the different airport buildings.

Every project is characterised by different needs and system specifications for various climates. All these projects share high energy efficiency, maximum integration, and total reliability resulting from the Climaveneta brand experience.
